Summary

A skilled Full-Stack Developer with over 1 year of experience, currently contributing to Ahadu Bank. My expertise lies in crafting robust, scalable, and user-centric applications using ASP.NET, Angular, and React. I have played a key role in major projects such as the Transport Management System, modernizing transport management through innovative technology solutions. From backend API development to seamless front-end interfaces, I thrive on solving complex problems and delivering high-quality digital experiences. Passionate about continuous learning and innovation, I stay current with emerging technologies to build impactful solutions. Let's connect and collaborate!

Technical Expertise

Frontend: Angular, React, Next.js, Vue.js

Backend: C#, .NET Framework

Database Management: MSSQL
